A Warning to Users of Alum Baking Powders.

CASES OF POISONING IN INDIANA.

The following appeared in the Logansport, Indiana, Times:—

Dr. Souder was summoned by telegraph last Sunday night to attend the family of Braden Harper, living southwest of Logansport. Four of the family were poisoned from eating dumplings. The father and one child, who had not partaken of the dumplings, were well, while the mother and three children were in a serious condition. It is probable that had not vomiting ensued, emptying the stomach, the four would have died from the effects. It is supposed the poison was caused from the baking powder used in making the dumplings. The wife probably

added a larger amount than she usually did, which in the greater quantity proved a noxious poison. The baking powder used was branded the * * * *, manufactured by the * * * *. This should be a warning in using cheap baking powders, which flood the country. People buy them because they are cheap, and the merchant buys them because he can sell them for a profit. In many stores one can not purchase a standard brand. You have to purchase the cheap stuff or do without. We are of the opinion that most of the prize baking powders belong to this class.

The highest authorities in chemical science pronounce alum injurious to health and a destroyer of digestion.

Here is explicit evidence that it is a noxious poison.

Alum baking powders likewise coagulate the blood rapidly, interfering with its ready course through the arteries and valves of the heart, predisposing to heart-failure.

The laws of Minnesota and Wisconsin prohibit the sale of alum baking powders, unless they are branded as a warning to the public.

By the laws of England it is a crime to put alum in bread in any form.

NOTE. The Royal Baking Powder Co. publish the above facts because they are facts of great importance, and to say that while alum baking powders are sold cheap they have little strength, and are dear at half price, to say nothing of their effect upon the health, and the bitter taste they impart to the food.

The Royal Baking Powder is far above question as regards its quality and healthfulness, because it is made of cream of tartar derived only from grapes. No other article has ever received such high praise for its quality.

Consumers may use the Royal with full assurance that they not only get the worth of their money, but that they also get the best cream of tartar baking powder that can be had.
